<u>Consent to Care</u>

A patient coming to the doctor gives his/her permission and authority to care for them in accordance with the appropriate tests, diagnosis and analysis. The clinical procedures performed are usually beneficial and seldom cause any problem. In rare cases, underlying physical defects, deformities or pathologies may render the patient susceptible to injury. The doctor, of course, will not provide specific healthcare if he/she is aware that such care may be contraindicated. It is the responsibility of the patient to make it known or to learn through healthcare procedures from whatever he/she is suffering from: latent pathological defects, illnesses or deformities which would otherwise not come to the attention of the physician. I affirm that I am not an agent or representative of any insurance company or any other business trying to collect information. All injuries/problems mentioned are true and I am here solely for the treatment of the said problem.

I have read and understand the consent to care. I certify that the above questions were answered accurately. I understand that providing incorrect information can be dangerous to my health.
